JUNIOR SOFTWARE DEVELOPER

SOFTWARE DEVELOPMENT | CLOUD & API INTEGRATION | ANALYTICAL

Available January 2027 for a 4-month co-op; returning to studies afterward

- Centennial College Software Engineering Technology – AI co-op student; developed and deployed three web applications: Aeruvo, FixSmart and FridgePulse.
- Applied programming, cloud computing and applications integration across React, Firebase, Gemini AI and Stripe-powered products.
- Troubleshot API failures and user workflows through software testing, logging, error handling and iterative maintenance; bring collaboration and communication experience.

TECHNICAL SKILLS

Programming: C# (OOP), Python, Java, JavaScript, SQL, HTML/CSS; C/C++ fundamentals
Frameworks & Libraries: React, TanStack, Node.js, Express, .NET, Angular, Tailwind CSS, Zod, NumPy
Tools & Systems: Git/GitHub, Unix/Linux, Jira, CI/CD, Spyder, Raspberry Pi
Software Practices: Software Development Life Cycle (SDLC), user requirements analysis, technical specifications, algorithms & data structures fundamentals, Quality Assurance (QA) & testing, Test Driven Development (TDD) fundamentals
Delivery & Safety: Git version control, debugging, troubleshooting, logging, error handling, release management, security requirements, microservices concepts
Databases & Cloud: Firebase, Vercel, Google Cloud Platform, AWS, Azure, MySQL, Oracle
APIs & Integration: REST APIs, Gemini AI/API, Stripe, application and system integration
Languages: Tamil (native); English (working proficiency); Sinhala (conversational)

EDUCATION

Software Engineering Technology – Artificial Intelligence (Co-op)
Advanced Diploma — Expected: Jan 2029
Centennial College, Toronto, ON — **GPA: 4.125/4.5**

- Relevant coursework: C# Programming, Java Programming, Database Concepts, Artificial Intelligence Systems Design, Web Application Development.

SELECT TECHNICAL PROJECTS

Aeruvo **| Personal Project, Toronto, ON** — Jun 2026 – Present

- Developed and deployed a React weather and clothing app using Firebase and Vercel; integrated Gemini image analysis to store wardrobe attributes and generate recommendations.
- Integrated Stripe Checkout and Customer Portal for trial, subscription and cancellation workflows.
- Troubleshot scanning and notification failures; implemented API retries, timeouts, structured logging, error handling and software tests to improve reliability.

FixSmart **| AI Repair Assistant, Hackathon Project** — Sep 2026

- Developed an AI-powered repair assistant with React, TanStack, Gemini AI and Firebase to analyze uploaded item photos and provide troubleshooting guidance.
- Designed safety-focused guidance for possible short-circuit or explosion risks, recommending professional repair for complex or hazardous cases; integrated Stripe payment functionality.

FridgePulse **| Centennial College Hackathon, Toronto, ON** — Aug 2026

- Built food inventory tracking, recipe generation, four-step food rescue workflow and rescue scoring for a sustainability application.
- Integrated image compression, Gemini structured outputs and Zod validation to extract food details and track freshness; tested application workflows.

WORK EXPERIENCE

Cashier / Sales Associate — Dec 2025 – Mar 2026
Yaal Supermarket / Agam Supermarket, Toronto, ON

- Processed POS transactions, resolved customer questions and replenished stock.

Installation Technician — Apr 2025 – Dec 2025
World Food Equipment, Toronto, ON

- Communicated with clients and troubleshot on-site installation challenges.

Cashier / Receptionist — May 2024 – Jan 2025
Glo Digital Studio, Sri Lanka

- Handled customer enquiries and cash transactions in a photography studio.
